

Srini P
Senior UI React Developer
srp99@gmail.com
+1682-233-5699

Professional summary:

- Highly motivated and professional with 9+ years of IT experience which includes object - oriented programming knowledge and experience in developing Professional Web applications, Mobile applications and Enterprise solutions using Web Technologies like HTML5, CSS3/LESS, JavaScript, Ajax, React, Redux, React Native, Angular, SAAS, ECMAScript6/7, jQuery, DOM, JSON, XML and AJAX.
- Experience in all phases of SDLC.
- Experience in DOM, React Props, Lifecycle methods, working with React States and Events.
- Expertise in React.JS framework to develop the SPA.
- Experienced in using React.JS components, Forms, Events, Keys, Router, Animations and Redux State Management.
- Expertise in React Component for UX - Library consisted of Button, Checkbox, Input, Icons, Toggle Button, Dropdown, Multi-Level Dropdown and many more.
- Experience in using React native components, Forms, Event, Keys, Navigation and Redux concepts.
- Experience on compatibility issues with different versions of browsers like IE, Mozilla FF, Safari and Chrome.
- Experienced in Native Mobile Application development with Social Media platform integrations such as Facebook, Twitter, and Google+ with Oauth token handling techniques
- Experienced with front-end development with back-end system integration.
- Experienced with various IDE's such as Visual Studio Code, Webstorm and Sublime.
- Understanding of Web Services and API's such as SOAP and REST.
- Debugging and testing with Jest, Enzyme and Cypress.
- Worked with JavaScript validations and developed Object-Oriented code.
- Experience in building continuous integration and continuous deployment using Jenkins and AWS Code Pipeline with any cloud repository.
- Expert in documentation using MS tools (Word, Excel, PPT, Project, Visio, and Access).
- Experience in multi-tasking aimed to accomplish the task by using TDD (Test Driven Development and Design).
- Strong communication skills, with the ability to convey concepts/requirements between technical and non-technical stakeholders.
- Excellent Interpersonal abilities, communication skills, time management and team skills with an intention to work hard to attain project deadlines under stressful environments.
- Demonstrated the ability to work independently, and the flexibility to adapt in an ever-changing business environment.
- Highly motivated self-starter and good team player and appetite to learn new technologies.

Technical Skills:

Web Technologies	HTML5, CSS3, SASS, LESS, JavaScript, Bootstrap, React.JS, Redux
Versioning Tools	GIT, SVN, Bit Bucket
Continuous Integration Tools	Docker, Jenkins
Debugging Tools	Chrome Elements Inspector, Firebug, IETester
Operating systems	Linux, Mac OS X, Windows.
Testing Frameworks	GitHub, SVN, Bit Bucket
Methodologies	Agile Methodology, Waterfall, Trello.

Professional Experience:

Integrity Marketing Group, Dallas, TX.
Integrity Connect
Senior UI Developer

Nov 2022 – Till Date

Responsibilities:

- Designing and implementing responsive and user-friendly UI components using React JS and related frameworks and libraries.
- Developing and maintaining unit tests, integration tests, and end-to-end tests to ensure the quality and reliability of the application.
- Troubleshooting and debugging code issues and providing timely solutions.
- Collaborating with UX designers to ensure the application's design is consistent with the user experience goals.
- Providing technical guidance and leadership to junior team members, including code reviews and knowledge sharing.
- Optimizing the application's performance and ensuring its scalability and maintainability.
- Working closely with backend developers to ensure seamless integration of the frontend with the backend APIs.
- Participating in codebase maintenance activities, including code refactoring, documentation updates, and bug fixing.
- Contributing to the open-source community by sharing code snippets, writing blog posts, and participating in online communities.
- Staying up to date with the latest industry trends and best practices, attending conferences and events, and sharing knowledge with the team.

Microsoft
Planning and Execution Tracker Redmond, Washington.
UI Lead Developer

Feb 2022 – Oct 2022

Responsibilities:

- Used HTML5, CSS3, Fabric UI for developing the components.
- Implemented React components both functional and classical for UI widgets.
- Involved in designing web pages using HTML5, CSS3, JavaScript, Bootstrap, React.js, and Redux.
- Worked with the project manager/scrum masters to create communication plan. Planned and created written communication with various stakeholders.
- Used Jest and Enzyme for mocking functions and writing unit tests setup for testing component coverage reports.
- Worked on Azure Pipelines for creating build and deployment.
- Participate in weekly Status Meetings with the Project Leader and Consulting Directors.
- Provide ownership of technical decisions on projects/teams
- Worked on React.JS components, Forms, Events, Keys, Router, Animations and Redux concept.
- Worked on React JS Virtual Dom and React views, rendering using components which contains additional components called custom HTML tags.
- Developed the React container and presentational components (as Stateless and Functional components when applicable).
- Worked on React.JS components, Forms, Events, Keys, Router, Animations and Redux concept.
- Used JIRA to keep track of outstanding bugs to reduce downtime, increase productivity, and improve communication.
- Experience in developing web applications using latest JavaScript features and frameworks such as React and Redux to build dynamic web pages. (React-router, JSX, Webpack, React-bootstrap).

CBRE Host
Role: Senior UI Developer,
Bangalore, Karnataka.

Aug 2021 – Jan 2022

Responsibilities:

- Used HTML5, CSS3, JSON and JavaScript for front end applications.
- Implemented React components both functional and classical for UI widgets.
- Involved in designing web pages using HTML5, CSS3, JavaScript, Bootstrap, React.js, and Redux.
- Worked with business to understand the functional and non-functional requirements.
- Responsible for Style, such as variables, mixing, operations and functions.
- Worked on React JS Virtual Dom and React views, rendering using components which contain additional components called custom HTML tags.
- Worked in using React JS components, Forms, Events, Keys, Router, Animations, and Redux State Management.
- Worked on AWS for Build and Deployment.
- Implemented stable React components and stand-alone functions to be added to any future pages.
- Used React JS for templating for faster compilation and developing reusable components.
- Configured Web pack to execute linters, magnifiers, pre/post-processors, tests, transpilers, etc. based on build target.
- Used Jest and Enzyme for mocking functions and writing unit tests setup for testing component coverage reports.
- Used React- Redux (connect) which is responsible for "map state to props" and "map dispatch to props".
- Improved the UI using Angular 8, Angular Material, Bootstrap, Priming.
- Experience in RESTful web services to integrate between Server side to Client Side
- Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Involved in complete SDLC - Requirement Analysis, Development, System and Integration Testing.
- Used JIRA to keep track of outstanding bugs to reduce downtime, increase productivity, and improve communication.

Tieto Evry
Role: Sr. UI Developer
Bangalore, Karnataka.

Dec 2020 – Jul 2021

Responsibilities:

- Designed dynamic and browser compatible pages using HTML5, CSS3, JavaScript React.
- Implemented for a validation using JavaScript and Regular Expressions
- Developed the React container and presentational components (as Stateless and Functional components when applicable).
- Worked on React.JS components, Forms, Events, Keys, Router, Animations and Redux concept.
- Worked on React JS Virtual Dom and React views, rendering using components which contains additional components called custom HTML tags.
- Developed the React container and presentational components (as Stateless and Functional components when applicable).
- Ant UI React Library used to design and develop Enterprise Applications with the help of Typescript.
- Worked on App Deployment on AWS (Build and Deployment)
- Used Jest and Enzyme for mocking functions and writing unit tests setup for testing component coverage reports.
- Involved with all stages of Software Development Life Cycle using Agile Methodology.
- Used GitHub for the Version control and JIRA for product management.
- Involved in designing and developing the web pages using HTML 5, CSS3, JavaScript, Bootstrap, SASS, LESS, React.js, Redux.
- Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Created required templates and reusable style sheets based on UI standards and company's requirements.
- Worked on cross browser compatibility issues and executed unit test cases using Jest and Enzyme.

Girmiti Software PVT LTD

May 2020 - Dec 2020

Role: Senior UI Developer

Project: Marshall School Fee Application, Bangalore, India.

Responsibilities:

- Communicate with the client to understand the requirement of the website, gained experience in project planning, involved in writing the Project Design Document and Project Plan Document
- Involved in reworking on single page applications using React, Redux, React-Router, and Bootstrap.
- Implemented user interface guidelines and standards throughout the development and maintenance of the website using JavaScript, jQuery, CSS and HTML.
- Hands on the process of development, testing and maintenance.
- Worked on React Native components, Forms, Events, Keys, Animations and Redux concept.
- Involved in designing and developing the web pages using HTML 5, CSS3, JavaScript, SASS, LESS, React Native, Redux.
- Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Implement modules into Node JS to integrate with designs and requirements.
- Worked extensively on Spring MVC framework to develop new internal web application.
- Enhanced and built reusable components across different modules using Custom directives and CSS classes.
- Participated as a team member in designing the user interface using HTML and CSS to make the interface use-friendly, especially child-friendly.
- Created Responsive Designs using HTML & CSS, Bootstrap.
- Created Cross-browser compatible.

Axcend Automation

Aug 2019 – May 2020

Role: Senior UI Developer

Client: Bosch

Project: - Bosch Mobility, Bangalore, India.

Responsibilities:

- Developed enterprise web applications using ReactJS and Redux architecture.
- Developed front-end applications using Redux for logically managing and updating application state and redux-thunk for async logic and data fetching.
- Used Middleware, Redux-Promise in application to retrieve data from Back-End and to also perform RESTFUL services.
- Components for UX-Library consisted of Button, Checkbox, Input, Icons, Toggle Button, Dropdown, Multilevel Dropdown, and many more.
- Built the reusable class components using React Redux based on the designs. Used Fetch for making a server request.
- Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Implemented Redux pattern by using the redux framework as a core dependency.
- Handling cross-browser/platform compatibility issues (IE, Firefox, Chrome) on both Windows and Mac.
- Worked extensively in ReactJS, including features like Hooks, Rendering API data with Hooks, use Effect, estate and created advanced customized React hooks components.
- Managed states in components using State Hooks and set up a subscription to the external data source for components using Effect Hooks without writing component classes.

Nineleaps

Apr 2019 – Aug 2019

Role: UI Developer

Project : Wadhvani Advantage, Bangalore, India.

Responsibilities:

- Designed the front-end applications, user interactive (UI) web pages using web technologies like HTML5, CSS3, JavaScript, React Js.
- Developed React Js pages, Web services calls for the application.
- Used React Js in development of the web application to bind the data/model that is being retrieved from a database through services provided in a controller to the view using scope.
- Worked on the Front end by using JavaScript.
- Developed user interface by using the React Js, Flux for SPA development.
- Implemented client-side Interface using React Js.
- Worked with React Js components, Forms, Events, Keys, Router, Animations and Redux concept.
- Build React components and stand-alone functions to be added to any future pages.
- Responsible for developing a front-end application using React Js and Redux architecture for internal teams' productivity use.
- Experienced in React Js and working with React Flux architecture for developing Single Page Applications SPAs.
- Worked on responsive design and developed a single ISOMORPHIC responsive website that could be served to desktop, Tablets and mobile users using React Js.
- Extensively used SASS (Syntactically awesome style sheets) while styling with CSS3.
- Involved in daily SCRUM meetings to keep track of the project status.
- Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Implementing Queries to the backend MongoDB database using Http service to fetch JSON contracts.

Nineleaps

Nov 2018 – Apr 2019

Role: UI Developer

Project: TESCO My Product, Bangalore, India.

Responsibilities:

- Working as a UI Developer, assisting my team in Designing and developing UI for an internal Web-based application.
- Developed UI using JavaScript, HTML, CSS, JavaScript validations and XML.
- Used JavaScript, ReactJS XML, HTML and CSS for developing the Web component of the application.
- Worked with clients to develop layout, color scheme for their website and implemented it into a final interface design with the HTML/CSS and JavaScript.
- Created Webpages according to client's guidelines and standards throughout the development and maintenance of the website using HTML, XHTML, CSS and JavaScript.
- Extensively used CSS to change the styles to be used in future web layouts and debugging the errors issues with CSS.
- Designed web pages using XHTML and CSS/CSS3.

Nineleaps
Role: UI Developer
Project: Youforma, Bangalore, India.

Jul 2018 – Nov 2018

Responsibilities:

- Developed data formatted web applications and deployed the script using HTML5, HTML, CSS and Client-side scripting using JavaScript.
- libraries to create slider and page-turning animations on calendar widgets.
- Used React Js virtual DOM instead of regular DOM for improved efficiency and performance.
- Used React JS to create views to hook up models to the DOM and synchronize data with the server as a Single Page Application (SPA).
- Designed Frontend within object-oriented JavaScript Framework using React JS.
- Used the feature of React JS of running the server and rendering the virtual DOM, returning to the browser as a regular page.
- Involved in trans piling, bundling and developing React components for the partner homepages using React.js.
- Used React flux to polish the data and for single directional flow.
- Implemented flux pattern by using Redux framework as a core dependency.
- Created flux stores to migrate an existing flux app to Redux.
- Designed web pages and used applications that meet business and user goals through a positive user experience.

Goggerly Software Solutions
Client: Hubble Homes, Hyderabad, India
Role: Web Application Developer

Jul 2015 - Jun2018

Responsibilities:

- Developed the User Interactive web application in a professional manner with using web technologies like HTML5, CSS3, Bootstrap, Less, JavaScript as per company's standards.
- Front End UI Developer with solid understanding of database designing development, JavaScript Libraries and installation of different modules.
- Experience in developing web applications using latest JavaScript features and frameworks such as React and Redux to build dynamic web pages. (React-router, JSX, Webpack, React-bootstrap).
- Extensively used jQuery, Node.js in implementing various GUI components in application portal.
- Solved Callback hells in Node.js by using Promises and Generators from ES6 resulting in unchaining of events and making the code efficient.
- Worked with the team of architects and back-end Developers to gather requirements and enhance the application functionality and add new features.
- Developed and implemented Web Services and used Spring Framework. Collecting the set of features to be implemented in the application.

Goggerly Software Solutions
Client: R- Groceries, Hyderabad, India
Role: Web Application Developer

Jul 2014 - Aug 2015

Responsibilities:

- Extensively involved design discussions and user experience sessions to provide inputs on the layout.
- Created interactive prototypes and specifications, including color palettes, screen layouts and user-interface elements.

- Used Angular -UI to achieve accordion and drop-downs.
- Used UI-router in Angular to make this a single page application.
- Created Angular.JS Controller which Isolate scopes perform operations in UI
- Implemented Presentation layer using CSS Framework, Wire-framing, and HTML5.
- Developed front end web applications by writing HTML code with the help of Search Engine
- Created design deliverables, such as specifications, templates, storyboards, wireframes, and mock-ups.
- Extensively used SASS (Syntactically awesome style sheets) while styling with CSS3.
- Implemented AJAX functionality using JQUERY, JSON and XML.
- Involved in the development of pages using Bootstrap framework for Responsive web design.

Goggery Software Solutions

Jul 2013 - Jun2014

Client: Markoo, Hyderabad, India

Role: Web Application Developer

Responsibilities:

- Understanding the business requirements and preparing the design document.
- Reviewed business requirements and discussed with the application architect about the design.
- Involved in responsive design and developed a single page responsive website that could be served to desktop, Tablets and mobile users using AngularJS.
- Utilized Agile Methodologies to manage full life-cycle development of the project.
- Developed user interface by using the AngularJS for SPA development.

Education:

- Bachelor of Technology in Computer Science Engineering, Narasaraopet Institute of Technology, Andhra Pradesh, India
